

THE 6th DeKUT INTERNATIONAL CONFERENCE ON SCIENCE, TECHNOLOGY, INNOVATION AND ENTREPRENEURSHIP

Author Guidelines for Full Paper Submission and Instructions for Poster Presentations

General Paper Guidelines

- The papers submitted will be accepted on condition that they are not copyrighted, or have not been accepted for publication elsewhere.
- Papers should be submitted in English and should contain no more than of 3500 words.
- Papers should be single-spaced with Times New Roman, 12 point fonts and the set top and bottom margins set at 1”, left and right margins at 1.25”. The body of the manuscript should be justified.
- Original articles should present data and information from original research. Reviews must be critical analyses of the subjects reviewed, giving the current and balanced view of all the issues.
- Reviews should be contributed by experts in their respective fields. The message carried in both reviews and original articles must be clear, and of significance.
- The original articles should be compiled in the following order: Title, Abstract, Key words, Introduction, Methods, Results and Discussion, Conclusion, References.
- Sections on references, tables and figures should each begin on a new page.
- The details of each component of the original articles are described in the below sample template.

Copyright: Authors of papers accepted for publication in the Journal of Applied Sciences, Engineering and Technology for Development (JASETD) will be expected to fill a copyright transfer form prior to publication.

Abstract title here

(Simply select each section and replace with your own text, do not change the format)

Alice First^a, Matthew Second^b and Casandra Third^a

^aSchool of Science, Dedan Kimathi University of Technology, Private Bag, Nyeri, 7381,
Kenya, E-mail: first@dkut.ac.ke

^bSchool of Alternative Sciences, Remote University, Just off Main Street, Mweiga, 8890,
Uganda.

Keywords: structures, perspectives, reactions, selectivities.

The abstracts for the 2019 should be submitted in the format of this document. Please set the page to A4 with 2.5 cm margins top and bottom, respectively, and side margins of 2.5 cm. The preferred font is Times New Roman, single spaced. The abstract including the title, author affiliations, and any references should not exceed one page: if it does, it will not be accepted and will be returned to the author(s) for further editing and resubmission.

Fonts and Formatting - Please retain the fonts and paragraph settings in this template. Do not edit or add anything to the Header/Footer fields in the document.

Title – Please try to use no more than two lines for the title.

Authors – Please use superscript letters to indicate author affiliations as shown in the format above. **This is only necessary if authors have different addresses.** The presenting author's name must be underlined and his/her e-mail address included after the relevant address.

Body of abstract – The first line of each paragraph should **not** be indented and there should be a blank lines between paragraphs. References (if any) should be indicated by numbers in square brackets [1], [2], ..., etc. in the text and be given at the end of the abstract [1] in a consistent format as appropriate to the particular discipline.

1. INTRODUCTION

This should provide sufficient literature on what has been done with regard to the problems being formulated, identifying milestones made so far and deficiencies in past approaches. The authors should outline the objectives to be accomplished in the paper. Sufficient references should be cited with preference being the most recent publications in the area. Citations should follow the American Psychological Association (APA) style. References within the text should be cited using the author / date system.

2. METHODS

In this section, a detailed description of the materials, methods and tools used in the work should be given. The components may include samples, study area, experimental design, protocols, data collection and analysis. Authors may include other subsections that are relevant in their respective research areas.

3. RESULTS AND DISCUSSION

Results should be concisely described in one of the following ways: text, table(s), figure(s) or chart(s), or image(s). All tables and graphics should be done in Ms. Word and incorporated into the body of the document in their proper places and should be referenced in the text. Tables should be numbered consecutively with Arabic numerals (e.g. Table 2) and have a short descriptive caption at the top. Avoid the use of vertical lines in the tables. Instead use only 3 full width horizontal lines (one outlining the start, one outlining the end, and one outlining the head row). Figures should be numbered consecutively with Arabic numerals (e.g. Figure 5). Graphs should be presented in such a manner that they can be understood without reading the text. Appropriate symbols should be used on graphs and explained in the legends. Graphs should not duplicate results presented in tables. The reproducibility and statistical significance of measurements, material or biological data, should be included where relevant. The discussion should provide an interpretation of the results and their significance with regard to previously published work.

4. CONCLUSION

This section highlights the most important finding(s) of the research and may also include the potential areas of further research.

ACKNOWLEDGEMENT

Use this section to appreciate support that facilitated the research with respect to infrastructure, technical support, data analysis and funding.

REFERENCES

Authors should cite the most recent references in their field. The APA style of referencing is recommended. Below are some of examples of reference formatting styles for titles of journal papers, books, conference proceedings, and other references sources.

Journal Papers: Aduol, F. W. (2009). Estimation of the Geoid using GPS double differentials, *Survey Review*, 24(2), pp 341 – 352.

Books: Rasnamurthi, B. and Raj, K. J. (2018). *Advances in Remote Sensing applications in India*. Mehta Press, New Delhi. pp 101-015.

Conference Proceedings: Kamau, C., Otieno, R., Tanui, J. and Wahid, A. (2004). Perturbations of the Eccliptic. In: Proceedings of the International Society of Photogrammetry and Remote Sensing, Hahn, M. and Behr, F.J (Eds). pp 105 – 118.

Technical reports: Cosyn B. and Pannisoni C. (1996). GIS (GRASS) set up for Hydrologic Sensing data from the Zwalm Catchment (Belgium). Cagliari, Italy, Center for Advanced Studies; Technical Bulletin no. CRS4 ENVPRJJ-95/1

INSTRUCTIONS FOR POSTER PRESENTATIONS

- a. The provided posters boards are 841mm x 1189mm in size, therefore posters should be no more than 841mm wide x 1189mm tall in size, preferably A0 size.
- b. The poster presentation should be clear, orderly, and self-explanatory.
- c. The poster should include the following elements:
 - i. The title of your poster should appear at the top in capital letters
 - ii. The author(s) name(s) and affiliation(s) are put below the title.
 - iii. **Overview:** A succinct summary of the purpose, methods, and results.
 - iv. **Introduction:** A concise statement of the objective and background of the work.
 - v. **Methods:** Description of the apparatus, samples, materials, etc. but not overwhelming detail.
 - vi. **Results:** Graphs, charts, pictures, etc., with a minimum of text to illustrate the nature of the results.
 - vii. **Conclusions:** Concise statement of the findings, indicating future research directions.

Push pins will be provided to attach your posters to the boards.
